

Project Design Phase-I
Solution Architecture

Date	04 May 2023
Team ID	NM2023TMD11979
Project Name	Automated weather classification using transfer learning
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.*
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.*
- Define features, development phases, and solution requirements.*
- Provide specifications according to which the solution is defined, managed, and delivered.*
